

30-DAY LEARNING ROADMAP

Personalized Plan — Python to AI/ML Foundations

ABTalks 60-Day Claude Challenge · Day 5 · Prompt B

Situation
Student

Skills
Python (basic)

Goal
AI/ML Foundations

Time
2 hrs/day

Level
Beginner

Style
Videos + Projects

WEEKLY MILESTONES & DAILY TASKS

Week 1: Python for Data

DAILY TASKS

- ▶ Day 1–2: NumPy basics (video + practice)
- ▶ Day 3–4: Pandas fundamentals
- ▶ Day 5–6: data cleaning exercises
- ▶ Day 7: clean a messy CSV dataset

RESOURCES

- ▶ Kaggle Python micro-course
- ▶ Corey Schafer Pandas playlist

MILESTONE

- ▶ Comfortable manipulating real datasets in Pandas

Week 2: Stats + Visualization

DAILY TASKS

- ▶ Day 8–9: core stats concepts
- ▶ Day 10–11: Matplotlib/Seaborn
- ▶ Day 12–13: EDA practice
- ▶ Day 14: EDA project, 3+ visuals

RESOURCES

- ▶ StatQuest YouTube playlist
- ▶ Kaggle public datasets

MILESTONE

- ▶ Can explore & visually explain any dataset

Week 3: Core Machine Learning

DAILY TASKS

- ▶ Day 15–16: regression w/ scikit-learn
- ▶ Day 17–18: classification basics
- ▶ Day 19–20: model evaluation
- ▶ Day 21: build + evaluate a classifier

RESOURCES

- ▶ scikit-learn official tutorials
- ▶ StatQuest ML playlist

MILESTONE

- ▶ Trained & evaluated your first ML model

Week 4: Capstone Project

DAILY TASKS

- ▶ Day 22–24: pick dataset, define problem
- ▶ Day 25–27: build end-to-end pipeline
- ▶ Day 28–29: polish + GitHub write-up
- ▶ Day 30: publish + post on LinkedIn

RESOURCES

- ▶ Kaggle beginner competitions
- ▶ GitHub README templates

MILESTONE

- ▶ One shareable, portfolio-ready ML project

SUGGESTED PROJECTS

BEGINNER

Clean & explore a public dataset in Pandas

INTER

Train & evaluate a classifier with scikit-learn

ADV

End-to-end ML pipeline, published on GitHub

FINAL OUTCOME

By Day 30: Working knowledge of Python-for-data + core ML, one polished GitHub project, and a public LinkedIn post documenting the journey — ready to start the next 30-day cycle toward "AI Engineer."

Context turned a generic plan into a plan built for you.
